September 15, 1950

ALPHABETICAL INDEX FOR CLIMATOLOGICAL SERVICE MEMORANDUMS
NO. 1 THROUGH NO. 15

(Note: CSM number and item are shown as 7-4 for CSM No. 7, Item No. 4.)

INSTRUCTIONS

A.

Agricultural Networks................................. 2-4
Amounts of Evaporation, how published.................. 3-18
Annual acknowledgment for Cooperative Observers........ 7-2; 15-3
Announcement concerning CSM........................... 1-1
Assignment of Station Names to Substations............. 1-13; 9-3
"Average" and "Mean", definition of............... 3-21
Averages, State and Division........................... 3-22
Autographic Records, microfilming and disposition of... 1-7; 8-14

B.

Bulletin, Cooperative Observer....................... 12-1; 13-1; 15-1
Bulletin \ Blank Work Forms, disposition of............ 14-3
Bulletin, Weekly Weather and Crop.................... 11-8; 13-4

C.

Carbon paper and pencils for Forms 1006 and 1009........ 5-12
Cautions to be observed in climatological work.......... 1-5
Change in CSM Format.................................. 14-1
Changes in Station Name, responsibility for........... 7-3
Changes for Services.................................... 1-14
Check on Minimum Thermometers........................ 14-2
Checking Forms 1009 at Section Centers............... 3-4
Climatological Data Base Maps........................... 5-1; 8-1; 10-5; 11-11; 12-2; 14-7; 15-8
Climatological Data, elevations in..................... 13-3
Climatological Data, free mailing list................. 2-18; 3-12; 4-8
Climatological Data, number to print................... 4-9
Climatological Data, Station Index in.................. 1-13; 7-3; 8-2
Climatological Data, Weather Summary in................. 2-6; 7-10; 8-4; 10-9
Climatological Records, interpolation of data from..... 5-3
Climatological Program, information on................ 10-13
Climatological Publications, non-routine................ 11-2
Climatological Service Improvement Program, two-phased
objective of............................................ 1-2
Climatological Service Memorandum, announcement
concerning................................................ 1-1; 14-1
Climatological Service Memorandum, Change in format........ 14-1
Climatological Service Memorandum items, comment on.... 4-3; 7-14; 8-11
Climatological Service Memoranda, suggestion for........ 5-7
Climatological work, cautions to be observed........... 1-5
Colored paper for Newsletters.......................... 10-7
Comment on Climatological Service Memorandum items..... 4-3; 7-14; 8-11
Comprehensive CSM Index .................................................. 15-2
Computation of Monthly and Annual Division and State Normals ........................................ 2-3
Consolidation of Forms .................................................. 1-9
Cooperative Observers, Annual Acknowledgment .......... 7-2; 15-3
Cooperative Observer Bulletin ........................................ 12-1; 13-1; 15-1
Cooperative Observers, distribution of Climatological Data and machine copies of Form 1009 .... 2-16
Cooperative Observers, letters from ......................... 3-13
Cooperative Observers, form letters for ................... 7-1; 15-7
Cooperative Observer Newsletters ................................. 2-2; 7-4; 7-9; 8-8; 10-8
Cooperative Observer Newsletter stencils ...................... 14-6
Cooperative Observer retained records ....................... 6-6
Cooperative Stations, Degree Days ................................. 7-12
Copying Data from Form 1011 ........................................ 10-11
Cotton Bulletins, railing to Central Office ................... 13-5
Credit for observers .................................................... 9-2
Custody of records ..................................................... 3-19

D.

Data from CAA and paid second-order stations,* publication of ........................................ 8-3
Data from Substations, policy on publishing .......... 6-7; 8-15
Data, publishing on date read .................................. 4-5
Date read, publication of data on ......................... 4-5
Death notices of Cooperative Observers, publishing of 6-5
Degree Days for cooperative stations ..................... 7-12
Delayed data and errors, publication of ................... 11-5
Definition of "Average" and "Mean" ......................... 3-21
Depositories for duplicate Forms 1130 .................... 5-8
Disposition of Autographic Records ......................... 1-7; 8-14
Disposition of blank Bulletin V Work Forms ............. 14-3
Disposition of manuscript copies of Forms 1009 .......... 6-9
Disposition of manuscript records from which data are not published ................................... 8-15
Disposition of WB Form 1078D, Hourly Precipitation Transcriptions ........................................ 14-4
Disposition of Weighing Rain Gage Charts from which data are not published ......................... 8-15
Disposition of Climatological Data and machine copies of Form 1009 to Cooperative Observers .... 2-16
Division and State Normals, computation of .......... 2-3
Divisions, State ...................................................... 3-20
Duplication of effort ............................................... 1-8

E.

Effort, duplication of ............................................. 1-8
Elevations in Climatological Data ......................... 13-3
Envelopes, window ................................................ 12-4
Errors and Delayed data, publication of.................. 11-5
Establishment of new Cooperative or Hydrologic Stations 3-11
Evaporation Amounts, how published....................... 3-18
Evaporation Amounts, recordings of...................... 6-12
Evaporation Station Reference Notes..................... 6-11

F.

Familiarity with instructions.............................. 12-8
Field, suggestions from................................... 1-11
File of Hydrologic Bulletins............................... 15-6
Files of substation records at Section Centers........... 8-12
Filing 1009 Summaries..................................... 11-12
Form letters, preprinted, for Cooperative Observers..... 7-1; 15-7
Format of Climatological Service Memorandum, change in 14-1
Forms, consolidation of.................................. 1-9
Forms 1006 and 1009........................................ 15-4
Forms 1006 and 1009, carbon paper and pencils for...... 5-12
Forms 1009, checking at Section Centers................. 3-4
Form 1009, disposition of manuscript copies............... 6-9
Form 1009 machine copies, distribution of, to Cooperative Observers................................. 2-16
Form 1009 Summaries, filing of............................. 11-12
Form 1010A for Storage Precipitation Gage Observations 10-4
Form 1011, copying data from............................... 10-11
Forms 1053A, B, C, and F................................ 11-9
Forms 1130, depositories for duplicate................... 5-8
Forms, weekly versus monthly, reporting................ 9-1; 10-2
Free mailing list for Climatological Data................ 2-18; 3-12
Frost in Ground, Observations of.......................... 10-3

G.

Guide for preparation of Weather Summary in Climatological Data................................. 3-16; 8-4

H.

Hydrologic Bulletin File.................................. 15-6

I.

Imprint on Weekly Weather and Crop Bulletin............. 5-9
Index, comprehensive for Climatological Service Memorandum........................................ 15-2
Information on the Climatological Program................ 10-13
Instructions, familiarity with................................ 12-8
Instructions for Observers................................ 10-12
Interpolation of data for climatological records........ 5-3
Items CSH, comment on.................................... 4-3; 7-14; 8-11
Letters, form, for Cooperative Observers............. 7-1; 15-7
Letters from Cooperative Observers.................... 3-13
Lists, mailing, Climatological Data.................... 4-8

Mailing Lists, Climatological Data...................... 4-8
Mailing List, free, for Climatological Data............ 2-18; 3-12
Mailing Newsletters.................................... 7-4; 10-8
Mailing Weekly Weather and Crop Bulletins
and Daily Cotton Bulletins to the Central Office.... 13-5
Manuscript Copies of Form 1009, disposition of........ 6-9
Manuscript records from which data are not published, routing and disposition of............... 8-15
Maps, Climatological Data base........................ 5-1; 8-1; 10-5; 11-11
12-2; 14-7; 15-8
Map to be submitted with request for change in
substation............................................ 12-3
"Mean" and "Average", definition of................... 3-21
Microfilming and disposition of autographic records... 1-7; 8-14
Microfilm program..................................... 1-7
Minimum thermometer check.............................. 14-2
Monthly and seasonal snowfall publication in
Climatological Data................................... 7-6
Monthly Weather Review, preparation of data for...... 11-3

Names of stations........................................ 15-5
Network, Agricultural.................................... 2-4
New Cooperative Stations, establishment of............. 3-11
Newsletters, colored paper for.......................... 10-7
Newsletters, mailing to Central Office.................. 7-4; 10-8
Newsletter, Section Center................................ 2-2; 7-4; 7-9; 8-8; 10-8
Newsletter stencils...................................... 14-6
Non-routine climatological publications................. 11-2
Number of Climatological Data to print................ 4-9

Observers, credit for.................................... 9-2
Observations of frost in ground.......................... 10-3
Observer instructions..................................... 10-12
Observation, time of.................................... 3-3; 4-4; 7-7

Precipitation daily in Climatological Data,
publication of.......................................... 12-6
Preliminary monthly precipitation summaries........ 11-1
Preliminary requests for Climatological Data.......... 14-5
Policy concerning publishing of Death Notices
of Cooperative Observers.................................. 6–5
Policy for assigning names to substations.............. 1-13; 9-3
Policy on preliminary monthly precipitation summaries... 11-1; 14-5
Policy on publishing substation data..................... 6-2
Preliminary monthly precipitation summaries........... 11-1; 14-5
Preparation of data for Monthly Weather Review........ 11-3
Preprinted form letters for Cooperative Observers..... 7-1; 15-7
Program, microfilming..................................... 1-7
Publication of daily precipitation in Table 3............ 12-6
Publications, non-routine climatological................. 11-2
Publication of snowfall and snow on ground in
Climatological Data........................................ 6-7
Publishing Climatological Data from CMA and
paid second-order stations................................. 8-3
Publishing data on date read............................... 4-5
Publishing Death Notices of Cooperative Observers.... 6-5
Publishing Errors and Delayed Data....................... 11-5
Publishing substation data.................................. 6-2

R.
Rainfall reports, special storm.......................... 6-13
Records, custody of........................................ 3-13
Recording evaporation amounts............................ 6-12
Recurring requests for Climatological Data prior
to publication................................................ 14-5
Reference notes for evaporation stations................. 6-11
Request for change in substation, maps to be
submitted...................................................... 12-3
Responsibility for changes in station name.............. 7-3
Retained record, Cooperative Observer.................... 6-6
Review of free mailing list for Climatological Data.... 2-1f
Routing and disposition of Weighing Rain Gage
Charts and manuscript records from which
data are not published...................................... 8-15

S.
Section Centers, checking of Forms 1009.................. 3-4
Section Center files of substation records............... 8-12
Section Center Newsletter................................... 2-2; 7-4; 7-9; 8-8; 10-8
Services, charges for........................................ 1-14
Snowfall and snow on ground in Climatological Data.... 6-7
Snowfall, monthly and seasonal publication in
Climatological Data........................................... 7-6
Special storm rainfall reports............................. 6-13
State and division averages............................... 3-22
State divisions ........................................ 3-20
Station index in Climatological Data .................. 1-13; 7-3; 8-2
Station names, policy on assigning to substations .... 1-13; 9-3; 15-5
Station names, responsibility for ...................... 7-3
Stencils, cooperative observer Newsletters ........ 14-6
Storage precipitation gage observations, use of
Form 1010a for ........................................ 10-4
Substation records, Section Center files of ........... 8-12
Suggestions for Climatological Service Memorandums . 5-7
Suggestions from field ................................... 1-11

T.

Text for Weather Summary in Climatological Data ... 10-9
Time of Observation .................................... 3-3; 4-4; 7-7
Two-phased objective of Climatological Service
Improvement Program .................................... 1-2

W.

Weather and Crop Observers Report .................... 11-9
Weather Summary in Climatological Data ............. 2-6; 3-16; 7-10;
8-4; 10-9
Weekly Weather and Crop Bulletin ..................... 13-4
Weekly Weather and Crop Bulletin, imprint on ....... 5-9
Weekly Weather and Crop Bulletins, mailing to
Central Office .......................................... 11-8; 13-5
WB Form 1078D, Hourly Precipitation Transcription,
disposition of .......................................... 14-4
Weekly versus Monthly reporting forms ............... 9-1; 10-2
Weighing Rain Gage Charts, from which data are
not published, routing and disposition of ............ 8-15
Window envelopes ....................................... 12-4
Work forms, blank, for Bulletin W, disposition of ... 14-3

GENERAL

A.

Analytical techniques in Climatology, improvement of... 1-4
Answering correspondence from the field ............... 2-20
Autographic record from Weighing Rain Gage ....... 15-11

C.

Cooperative Observers, recruitment of ................ 15-9
Climatological Data maps ................................ 14-9
Cooperative Observers, length of Service awards ..... 2-1; 4-10; 8-5
Cooperative observations, suggestions for improvement of 2-10
Correspondence from field, answering ................ 2-20
Data published by WRPC, reliability of .................. 6-1
Distribution of Weatherwise .............................. 2-21; 3-17; 4-1; 8-16

E.
Entering station numbers on Forms 1006 and 1009 ....... 12-7; 14-8

F.
File of Forms 1030 .............................................. 2-14
Filing substation forms ....................................... 6-10
Forms 1006 and 1009, revision of .......................... 12-5
Forms 1006 and 1009, entering station numbers ............ 12-7; 14-8
Forms 1006 and 1009, identification of ................. 15-10
Form 1009R ...................................................... 6-8
Form 1030, file ................................................. 2-14

G.
Identifying Forms 1006 and 1009 which are not routed to WRPC .............................. 15-10
Improvement of Analytical Techniques in Climatology ....... 1-4

L.
Length of Service Awards, Cooperative Observers ........ 2-1; 4-10; 3-5

M.
Mechanization Program ....................................... 1-3

P.
Precipitation, seasonal ....................................... 9-4

R.
Recruitment of substation observers .......................... 15-9
Reliability of data published by WRPC's ...................... 6-1
Reports from Section Centers .................................. 3-23
Revision of Forms 1006 and 1009 .............................. 12-5

S.
Seasonal precipitation ....................................... 9-4
Section Center Reports ....................................... 3-23
Substation forms, filing ...................................... 6-10
Substation observers, recruitment of ...................... 15-9
Suggestions for improvement of Cooperative Observations 2-10
"Unofficial" Storm Data in Climatological Data........ 15-12

Weatherwise, distribution of.......................... 2-21; 3-17; 4-1; 8-16
Weighing Rain Gage Autographic Records.............. 15-11
